

1 Design

2 Implementation

The house class hold all the information and operations needed to represent and draw the house object.

▷▷ house.h ◁◁

```

class House
{
public:
    House();
    House(int number, Point location);
    void plot() const;
private:
    Point location;
    int number;
};
    
```

◇◇◇

▷▷ lab2.cpp ◁◁

```

#include "ccc_win.h"
#include "house.h"
int ccc_win_main()
{
    House h;
}
    
```
